

# 2025 IMPACT REPORT

Climate Advocacy: **Local Action, National Impact**

“

The most important shift we can make is to focus less (relatively speaking) on developing policy and more on policy’s prerequisites: influence and power. We have solutions. We need more sway.

— DAVID BECKMAN, PISCES FOUNDATION

“

Public sentiment is everything. With public sentiment, nothing can fail; without it, nothing can succeed.

— PRESIDENT ABRAHAM LINCOLN

“

Field-building efforts are one of the most valuable investments funders can make, but historically such efforts are the least funded.

— THE BRIDGESPAN GROUP

“

Economy, food, housing, transit — all of these are civil rights issues. And climate issues intersect with every single one.

— JACQUI PATTERSON, 2024 TIME WOMEN OF THE YEAR

## Greetings,

Just when you think climate couldn’t get more intense or be more critical, things ratchet up another notch. It is ironic that now, when America finally has viable, scalable climate solutions at hand, we run into such dramatic political headwinds and surging new energy demands.

America is at a threshold. Do we move forward into the new clean energy era, or regress back to costly, destructive dirty energy? The consequences are becoming ever clearer. Climate change now drives political, social, and economic disruption — undermining democracy, fueling migration, and exacerbating inequality and injustice.

Technical solutions are no longer enough. We must create deeper societal conditions that drive both climate solutions and democracy. That means reaching everyday Americans across the nation and empowering their personal and civic actions to determine our shared future.

**It can be done.** We need to shift our mindsets and priorities toward people. Join them, don’t make them join us. Give them action and hope, not fear and hopelessness.

**That’s what ecoAmerica does — we move society toward climate solutions.** Our networks of national health, faith, and civic organizations reach across America, at scale, with trust and credibility. We invite and support a broad diversity of people to address climate change at home, at work, and in their local communities. This approach is working, and with your partnership, we can reach even further. Together, we can accelerate the pace and scale of climate progress in America.

Join us!

Blessed Tomorrow Climate Ambassadors at the Day of Action for Climate

## Our Mission

*ecoAmerica moves society toward climate solutions by engaging and supporting trusted national institutions to inspire and empower their millions of members in local communities across America to visibly act and advocate for ambitious, just, climate mitigation, resilience, and restoration.*

# Moving Society Toward Climate Solutions

We need the widespread engagement of Americans — beyond those the environmental movement already reaches — on climate solutions in a way that inspires them to reduce their own emissions and empowers them to invite their neighbors, workplaces, communities, and policymakers to join in climate action and advocacy. ecoAmerica's unique strategy does just that.

We **build national leadership** by building program executive committees of diverse health, faith, and civic leaders to guide and support inclusive sector-based climate programs.

We partner with over 100 trusted national organizations that have credibility and deep **reach into every community in the nation** and provide collaborative programs, resources, gatherings, and support so they can engage their affiliates and the public.

We **train and support thousands of local leaders** with sector and regionally tailored training and sophisticated online platforms to empower action and advocacy.

We **provide sector-based campaigns** like One Home One Future, ClimateRx, and Election Earth to activate local public support and political resolve for climate solutions.

We **celebrate effective climate advocacy** and help others replicate success locally, regionally, nationally, and amongst youth with our American Climate Leadership Awards.

We **conduct and share attitude, communications, and social science research** and apply it to tailor our core programs and ensure effectiveness for each of our partners.

Our research shows people need to know how they can make a difference. They need to be invited into accessible action and have the support of their families, neighbors, and colleagues. They need their trusted leaders in their local communities to lead. ecoAmerica builds and activates a broader diversity of new climate activists and communities across America.

# Creating a New Movement for Climate Action

Societal transformation toward a climate-safe world is swifter and more just by including a broad diversity of people in planning and action. However, the kinds of things many environmentalists talk about (dire warnings, devastating impacts, wonky solutions, sacrifice) only resonate with about 15% of the population, and discourage the rest. Americans are looking to leaders in their daily lives for cues on what to think, do, and say. They need to be invited into climate action.

ecoAmerica's network, which includes key sector leaders, is already in place and resilient to administration shifts. Our three core programs in health, faith, and local communities serve over 110 national organizations that have trusted reach into virtually every community in America, including 1 in 4 professionals.

**Climate for Health** has 52 prominent health leaders working with 46 partner organizations serving > **60 million Americans** across the nation.

[ClimateforHealth.org](https://ClimateforHealth.org)

**Blessed Tomorrow** empowers 43 denominations to mobilize 121,600 congregations and **66 million congregants** to connect climate change with their faith.

[BlessedTomorrow.org](https://BlessedTomorrow.org)

**Path to Positive Communities** helps community and youth leaders advance climate action in **19,000+ communities** with 36 locally anchored national leaders and partners.

[PathtoPositive.org](https://PathtoPositive.org)

Climate for Health at NYC Climate Week

2025 National Faith + Climate Forum

Bob Perkowitz and ACLA 2025 winner, and partner, Change Is Simple's Lauren Belmonte and Lark Parmalee

# Campaigns to Mobilize and Inspire

ecoAmerica supports our partners' visible climate leadership through strategic counsel, training, research, resources, communications guidance, advocacy opportunities, leadership roundtables, forums, and conferences.

ecoAmerica also helps our partners engage their constituents and the public through **national campaigns that catalyze climate action and advocacy**:

**ClimateRx** helps health professionals educate patients about the impacts of climate change on their health and strategies for action. From scannable badges to waiting room brochures and advocacy, ClimateRx provides vital guidance and activation in the clinical setting and beyond.

[ClimateRx.org](https://ClimateRx.org)

**One Home One Future** is a multi-faith campaign and coalition for visible creation care and climate action in local congregations across the country. It provides seven pathways for action to help people of faith act and advocate for just and equitable solutions.

[OneHomeOneFuture.org](https://OneHomeOneFuture.org)

**Election Earth** is a year-round voter education campaign to inspire and guide Americans in exercising their democratic rights and supporting voting rights in their communities.

Americans are more likely to engage in and sustain efforts for a brighter future when they work alongside people they know and trust.

# Making an Impact

ecoAmerica addresses climate change from a societal movement perspective. We fill a gap in the climate movement, inviting a broader diversity of Americans to act and advocate. We will know that we have succeeded when:

- **A critical mass (15-25%) of the top national American health, faith, and civic institutions** make just and equitable climate solutions a top priority.
- **These organizations shift to visibly leading on climate** and are inviting their professional members to do the same.
- **These organizations are “leading by example”** by demonstrating the importance, feasibility, and practicality of climate solutions.
- **These professionals offer trusted, visible leadership** in communities across the nation, bringing climate solutions home through local relationships and everyday influence.
- **An increasing majority of their members feel motivated and empowered to engage on climate and be part of the solution** above, 60% and increasing year over year.
- **Through institutions and their professional members, 40% of Americans are being inspired, engaged, and invited into climate solutions.** They understand that a) we can solve the climate challenge, b) doing so will reap a multitude of benefits, and c) through their own behaviors and advocacy, they can make a difference.

Our partnership with ecoAmerica supports AME churches as they lead boldly on environmental justice and stewardship, grounded in faith and community.

— DR. JACQUELYN DUPONT-WALKER, FOUNDING PRESIDENT, WARD ECONOMIC DEVELOPMENT CORPORATION (WEDC); CHAIR, SOCIAL ACTION COMMITTEE, AME CHURCH

Executive Director, Meighen Speiser speaking at AME Conference 2025

## Measuring What Matters

ecoAmerica measures impact in three ways including reach, activity, and shifts in motivation and action.

### REACH

Size, scale, and diversity of our partners (constituencies, regions); number and diversity of ambassadors and local climate leaders; campaign reach.

**Example:** *Climate Ambassadors take an average of 12+ climate actions and lead 5+ climate presentations reaching 100+ people annually.*

### ACTIVITY

The visible activities of our partners and members to engage society with statements, programs, events, action, and advocacy efforts.

**Example:** *The 2025 National Faith + Climate Forum brought together more than 2,000 participants at over 80 in-person events spanning more than 550 congregations and 30 denominations.*

### SHIFTS IN MOTIVATION AND ACTION

Measured through surveys and before-and-after case studies, tracking changes in attitudes and personal and public climate behaviors faster than the national baseline.

**Example:** *ACPS Vol. III — Republicans’ recognition that climate change is driving extreme weather events has jumped 17 points.*

### PARTNER SPOTLIGHT

## African Methodist Episcopal Church (AME)

Our 10-year partnership with [AME](#) — the oldest historically black denomination in the US — supports their climate leadership across more than 7,000 congregations with more than 2.5 million members in the US. We helped them prepare and adopt their first climate resolution (including a bishop’s video) at their 2016 quadrennial convention. AME’s Director of Social Action joined our board in 2018. We invited thousands of AMEs into action with activating resources, campaigns, research, and speaking at the ‘19, ‘23, and ‘25 Women’s Missionary Society meetings. AME bishops invited us into their ‘25 retreat to inform the district climate strategy. AME now has 50 trained climate ambassadors, 101 OHOF congregations, and 8 National Faith + Climate Forum host sites, including a congregation that serves as a resilience and care distribution center after the Altadena fires.

PARTNER SPOTLIGHT

## League of United Latin American Citizens (LULAC)

Prior to 2023, [LULAC](#) — the nation’s oldest and largest Latino civil rights organization — had no active environmental programming for its 325,000 members and supporters. We’ve worked closely with LULAC’s CEO to convince their board to make climate a core strategic pillar, and climate is now featured in communications, major events (‘23, ‘24, ‘25 Convention, Legislative Conference 24), and programming. LULAC fellows are collaborating with us to analyze and report on research. Also, we are training at least one climate ambassador in each of their 535 local councils and hundreds of youth annually through LULAC Academy to support LULAC in dramatically scaling climate advocacy.

Path to Positive Director, Brett Matulis speaking at LULAC Conference 2024

Climate for Health Director, Ben Fulgencio-Turner, with colleagues at the Our Planet, Our Health 2025 Climate Action Convention, including an infectious disease MD from Children’s National Hospital, the Executive Director of the Planetary Health Alliance, and a family physician formerly with a NACHC-member clinic in Washington, DC.

PARTNER SPOTLIGHT

## National Association of Community Health Centers (NACHC)

For the past 3 years, ecoAmerica’s Climate for Health program has partnered with [NACHC](#) — serving 16,000 health clinics and over 30M underinsured people — to move climate action forward as a matter of health equity. We have provided strategic guidance, a depth of resources, conferences, and trainings, covering such topics as heat, air quality, resilience, and solar microgrids, to center climate action and resilience in all NACHC health centers. In addition, we are co-designing a Health and Emergency Guide with them to help health centers operate as hubs during climate disasters. These hubs will utilize backup power systems and coordinate with local partners to create a disaster framework in the Gulf Coast.

# Climate Ambassadors: Local Voices, National Reach

ecoAmerica's Climate Ambassador training program helps everyday Americans feel confident speaking, acting, and advocating for solutions. Training is tailored for each sector and partner and includes both in-person and online training. Trainees are invited into the Ambassador Community, providing opportunities for ambassadors to continue learning, connect, collaborate, act, and advocate.

Currently, more than **7,500 people** have completed the three-hour training. Ambassadors average **13 advocacy actions** with **90 participants** that engage over **650,000 Americans**.

## Advocating for Climate Health Policies in Virginia

Dr. Janice Hawkins, [Climate for Health Ambassador](#) and ACLA Finalist

Dr. Janice Hawkins met with Virginia State Legislators, Senator Craig and Delegate Leftwich during the Virginia Clinicians for Climate Action Advocacy Day to advocate for climate-friendly practices, such as solar panel mandates for new parking lots and safety standards for high-heat days. Janice and her 18 graduate-level students were successful in promoting public health and sustainability measures.

## Year-Round Climate Justice Advocacy in Evanston, Illinois

Mark Sloss, [Blessed Tomorrow Ambassador](#)

Mark Sloss has transformed Evanston's indoor winter farmers market into a hub of climate justice advocacy. Hosting a year-round climate advocacy table, Mark engages the community in meaningful discussions and actions, such as supporting local climate measures and enrolling residents in community solar projects.

## Driving Urban Sustainability in Omaha

Christie Abdul-Greene, [Path to Positive Communities Ambassador](#)

Through advocacy and local government engagement, Christie Abdul-Greene played a crucial role in the adoption of Omaha's Climate Action and Resilience Plan. The plan integrates sustainability into the city's 20-year master plan. Christie's approach doesn't stop at policy; she also extends her efforts to include a sustainability business directory and educational programs that cultivate a green-conscious generation.

# Celebrating Leaders

ecoAmerica recognizes and celebrates exceptional local, regional, and national climate action and advocacy through the **American Climate Leadership Awards (ACLA)**. Our annual recognition program that lifts up individuals and organizations that are broadening participation and moving America toward climate solutions.

Since its launch in 2019, ACLA has received over 1,000 applications, honored over 150 local and national leaders, and granted more than \$1 million to support and expand their climate work. Through financial awards, national recognition, and tools to share replicable models, the program helps accelerate proven solutions in communities across the country.

Each year, a diverse panel of nationally celebrated judges helps ecoAmerica determine awardees across Adult, Youth, and Honor categories. Semi-finalists (\$1,000) up to winners (\$50,000) receive funding to expand their efforts, and [how-to guides](#) are created and promoted for all finalists so others can learn from and replicate their success.

The impact of the program reaches far beyond the award itself. ecoAmerica hosts a national awards broadcast in which finalists are featured and the winners and runners-up are announced. **The ACLA broadcasts have garnered more than 100,000 views.**

By celebrating leaders who are delivering results and sharing what works, **the ACLA program helps build the public will and practical know-how needed to tackle climate change** at the local and national levels, and create a healthier, more equitable future.

Left page photo (left to right): Awards Broadcast Co-Hosts, Bob Perkowicz, Meighen Speiser, Vanessa Hauc, Jerome Foster II

## AMERICAN CLIMATE LEADERSHIP AWARDS

Celebrating Action from Local to National

# Equipping Leaders

ecoAmerica grounds its resources, research, and convenings in social science to equip trusted leaders with the insights and tools they need to inspire climate action in every community across America. Our foundational American Climate Values Survey revealed what drives people to care and act, establishing the values-based approach that guides our work today.

## Research That Drives Impact:

Our *American Climate Metrics Survey (ACMS)* and *American Climate Perspectives Survey (ACPS)* offer timely insights on public opinion. In 2025, our *Americans Want Fair Action* report found that 72% of Americans are concerned about climate change, and 81% recognize its unequal impacts. Notably, 72% of Republicans acknowledge these disparities, up 9 points since 2021. Climate now ranks among the top three fairness issues Americans want addressed.

Our *Americans Reject President Trump's Climate Rollbacks* research revealed growing bipartisan opposition to environmental deregulation, with strong pushback from Republicans under 45. Findings were featured in *The Hill*.

## Resources That Inspire and Guide:

New tools this year include the *Time to Lead* series for CEOs, *Grand Rounds* kits for health professionals, the *Skit Kit* for community engagement, and an updated suite of *How-To Guides* to make climate advocacy tangible and actionable. We also released a new three-part series on youth climate mental health: *A Guide for Parents and Caregivers*, *A Guide for Educators*, and *A Guide for Health Professionals*. These guides offer practical steps to support the mental health and resilience of children and youth facing the climate crisis.

Rev. Carol Devine speaking at the 2025 National Faith + Climate Forum

## National Convenings that Shape the Climate Conversation

ecoAmerica brings together leaders across health, faith, and civic sectors for high-impact, national convenings that shape the future of climate leadership in America. These events aren't just gatherings, they're catalysts. In 2025, our National Faith + Climate Forum and Our Planet, Our Health Forum collectively reached thousands, spotlighting urgent challenges and breakthrough solutions at the intersection of climate, health, and values.

The **2025 National Faith + Climate Forum** brought together more than 2,000 participants at over 80 in-person host locations spanning more than 550 congregations and 30 denominations.

In the health sector, we helped form a breakthrough coalition of eight top associations, including the National Academy of Medicine and Kaiser Permanente, to co-host the **Our Planet, Our Health: 2025 Climate Action Convention**.

# Program Partners

ecoAmerica supports and collaborates with over 100 partners in health, faith, and local communities that reach nearly all Americans multiple times over. Thank you to the following partners for your visible climate leadership and action.

**More than 1.5 million doctors, nurses, and health professionals reaching over 60 million Americans**

- Alliance of Nurses for Healthy Environments
- American Academy of Nursing
- American Academy of Pediatrics
- American Association of Occupational Health Nurses
- American College of Physicians
- American College of Sports Medicine
- American Geophysical Union
- American Lung Association
- American Psychological Association
- American Public Health Association
- Association of Public Health Nurses
- Association of State and Territorial Health Officials
- Children's Environmental Health Network
- George Mason University Center for Climate Change Communication
- Health Care Without Harm
